Nugget Line — current vs future state

C.H. Guenther & Son — Duncanville, TX · 11/13/2026 · Comparison report

This report contains DEMONSTRATION DATA. Values are illustrative and are not plant measurements. Values shown as NYC are Not Yet Collected. Each result is labeled Verified inputs, Estimate or Incomplete according to the status of its inputs. Estimated savings are not validated until Finance confirms them against actual cost results.

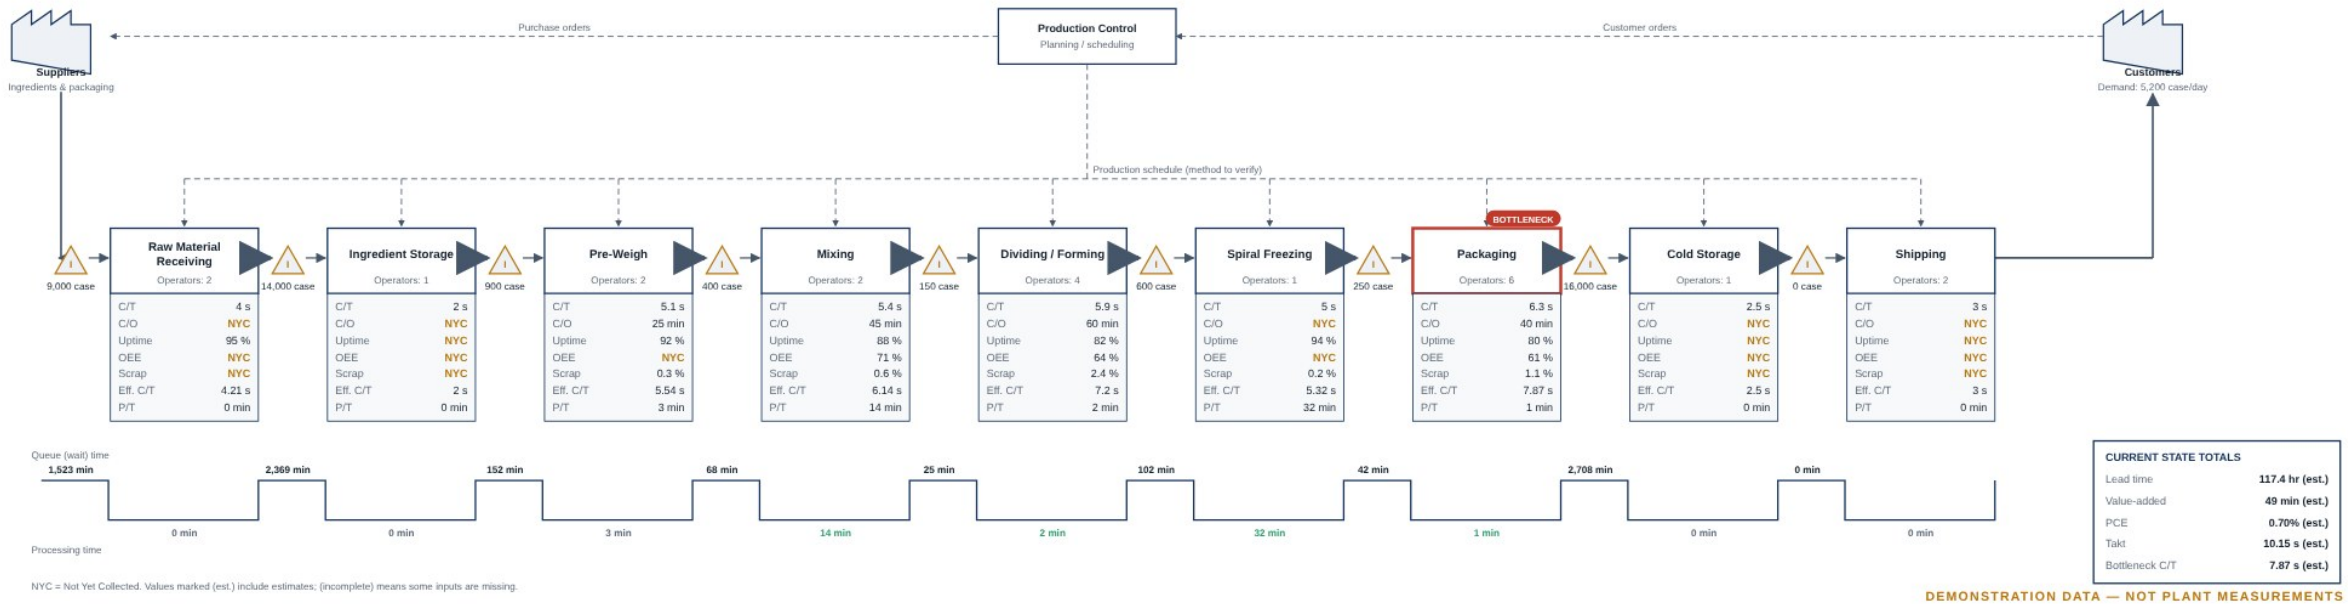

KPI comparison

Current vs future state

Measure	Current	Future	Change	Data status
Total lead time (hr)	117.35	115.52	-1.83	Estimate
Value-added time (min)	49	49	0	Estimate
Process cycle efficiency	0.70%	0.71%	0.01%	Estimate
Bottleneck effective C/T (s)	7.87	6.67	-1.21	Estimate
Line capacity (case/hr)	457	540	83	Estimate
Rolled throughput yield	95.47%	96.25%	0.78%	Incomplete
Changeover (hr/week)	17	13	-4	Estimate
Total labor (people)	21	20	-1	Estimate
Travel labor (hr/yr)	661	509	-152	Estimate
Travel labor cost ($/yr)	$18,499	$14,245	" $ 4 , 2 5 4	Estimate

Estimated benefit (not validated)	Value	Data status	Note
Travel labor savings	$4,254/yr	Estimate	Hard savings only if paid hours come out
Changeover hours freed	208 hr/yr	Estimate	
Changeover labor value	$27,664/yr	Estimate	Capacity unless Finance confirms
Scrap reduction (at cost)	$96,642/yr	Incomplete	
Throughput potential	18.1%	Estimate	

Value stream map — current state

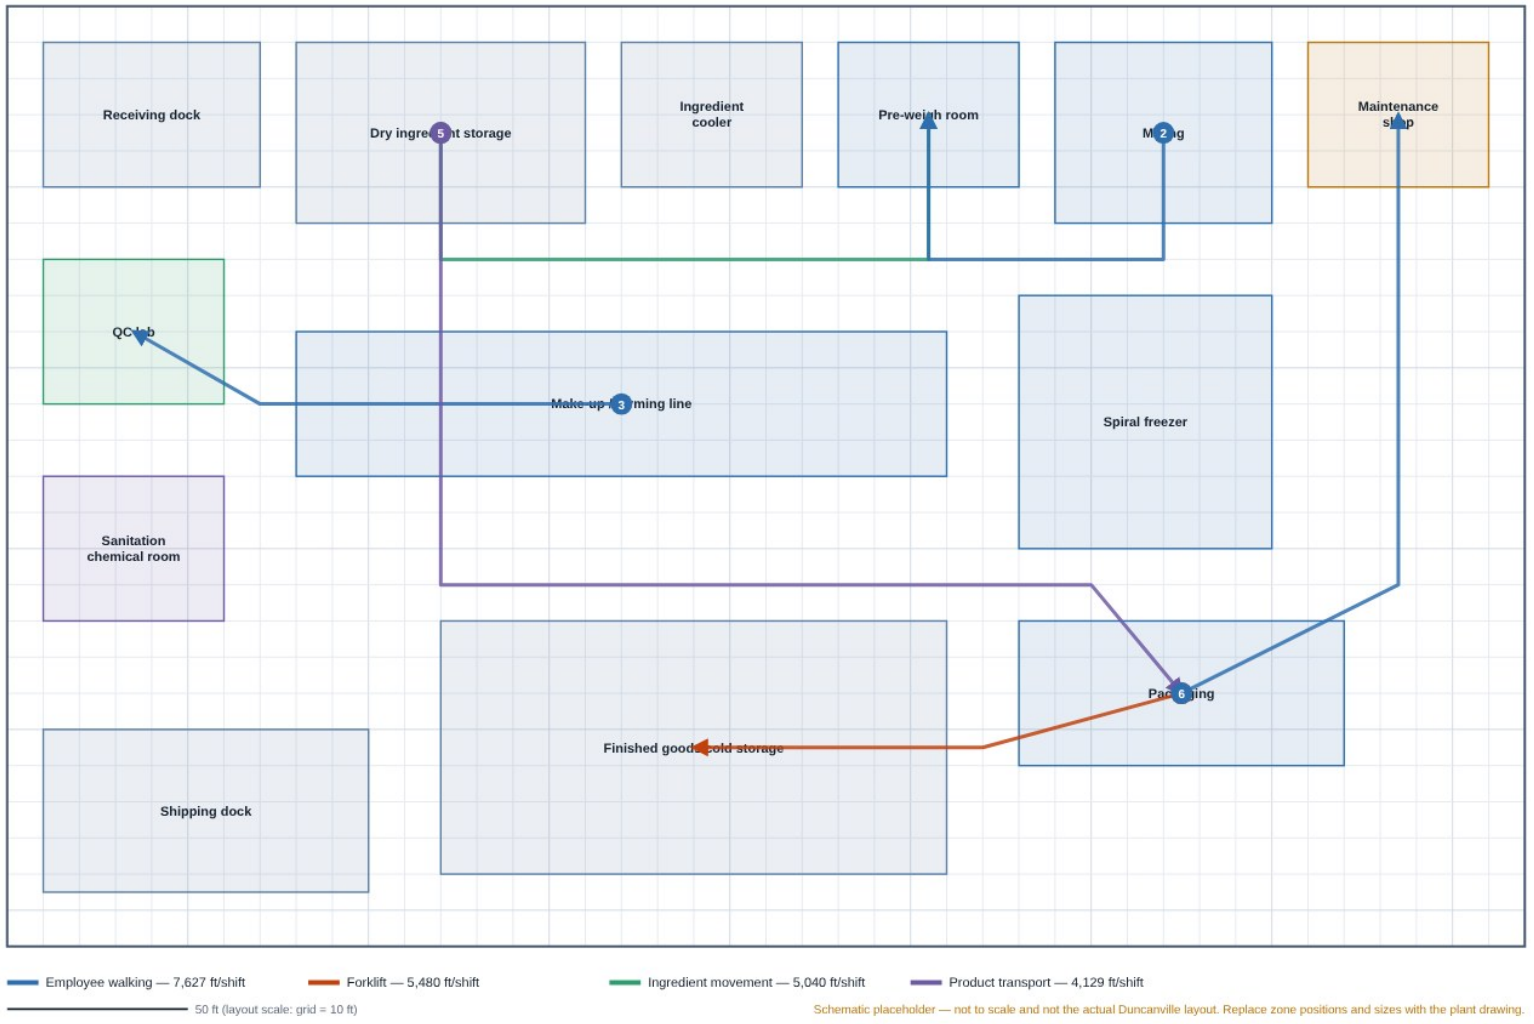

NYC = Not Yet Collected. Values marked (est.) include estimates; (incomplete) means some inputs are missing.

DEMONSTRATION DATA — NOT PLANT MEASUREMENTS

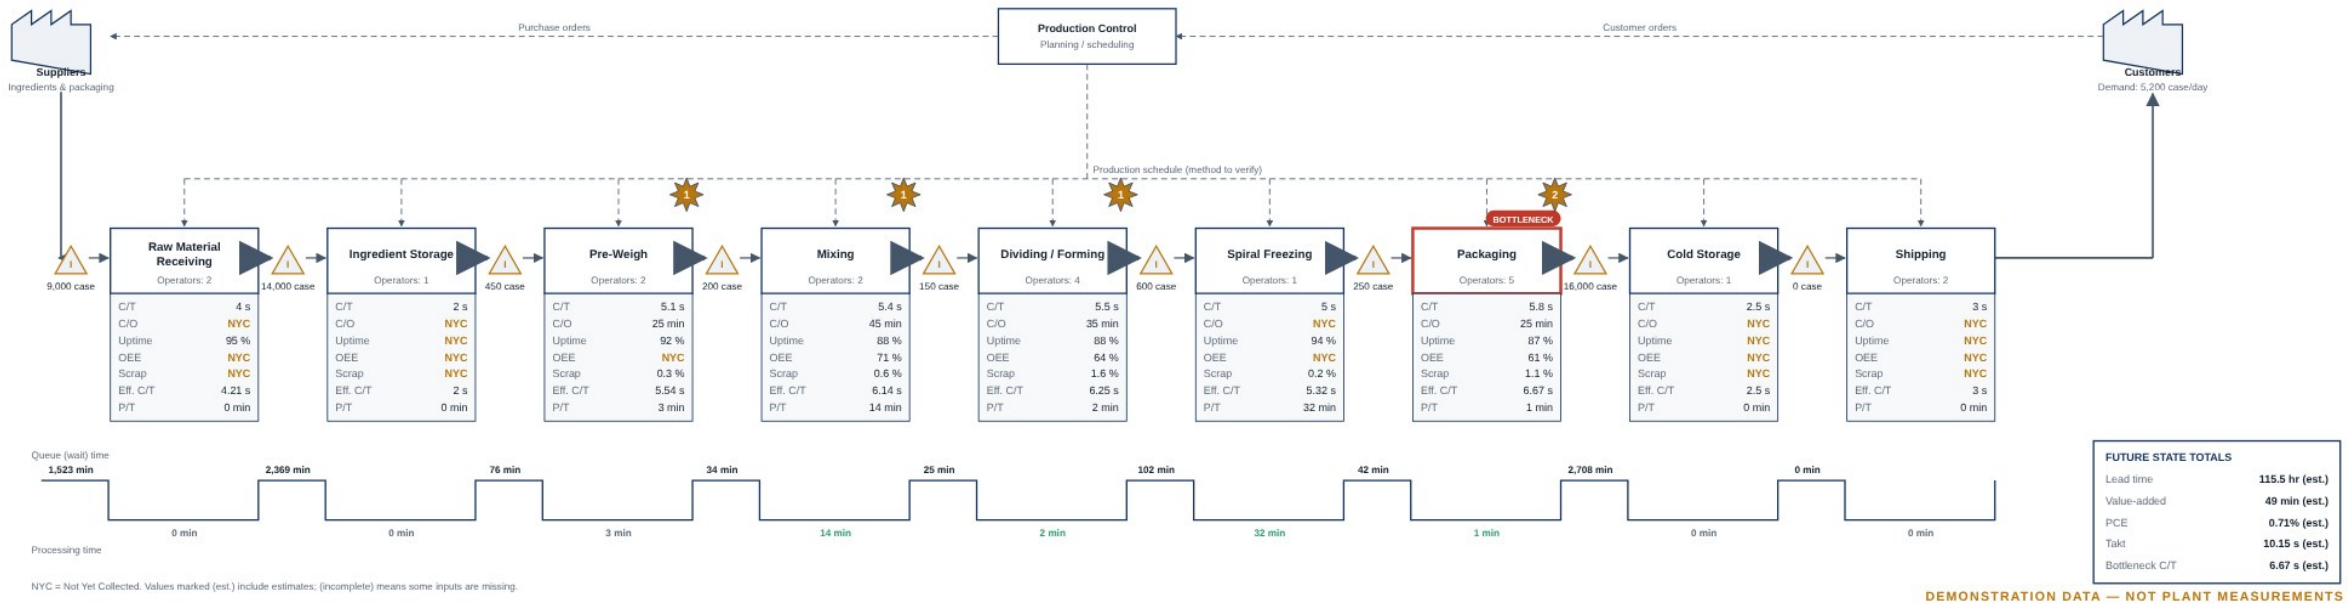

Spaghetti diagram — current state

Schematic placeholder — not to scale and not the actual Duncanville layout. Replace zone positions and sizes with the plant drawing.

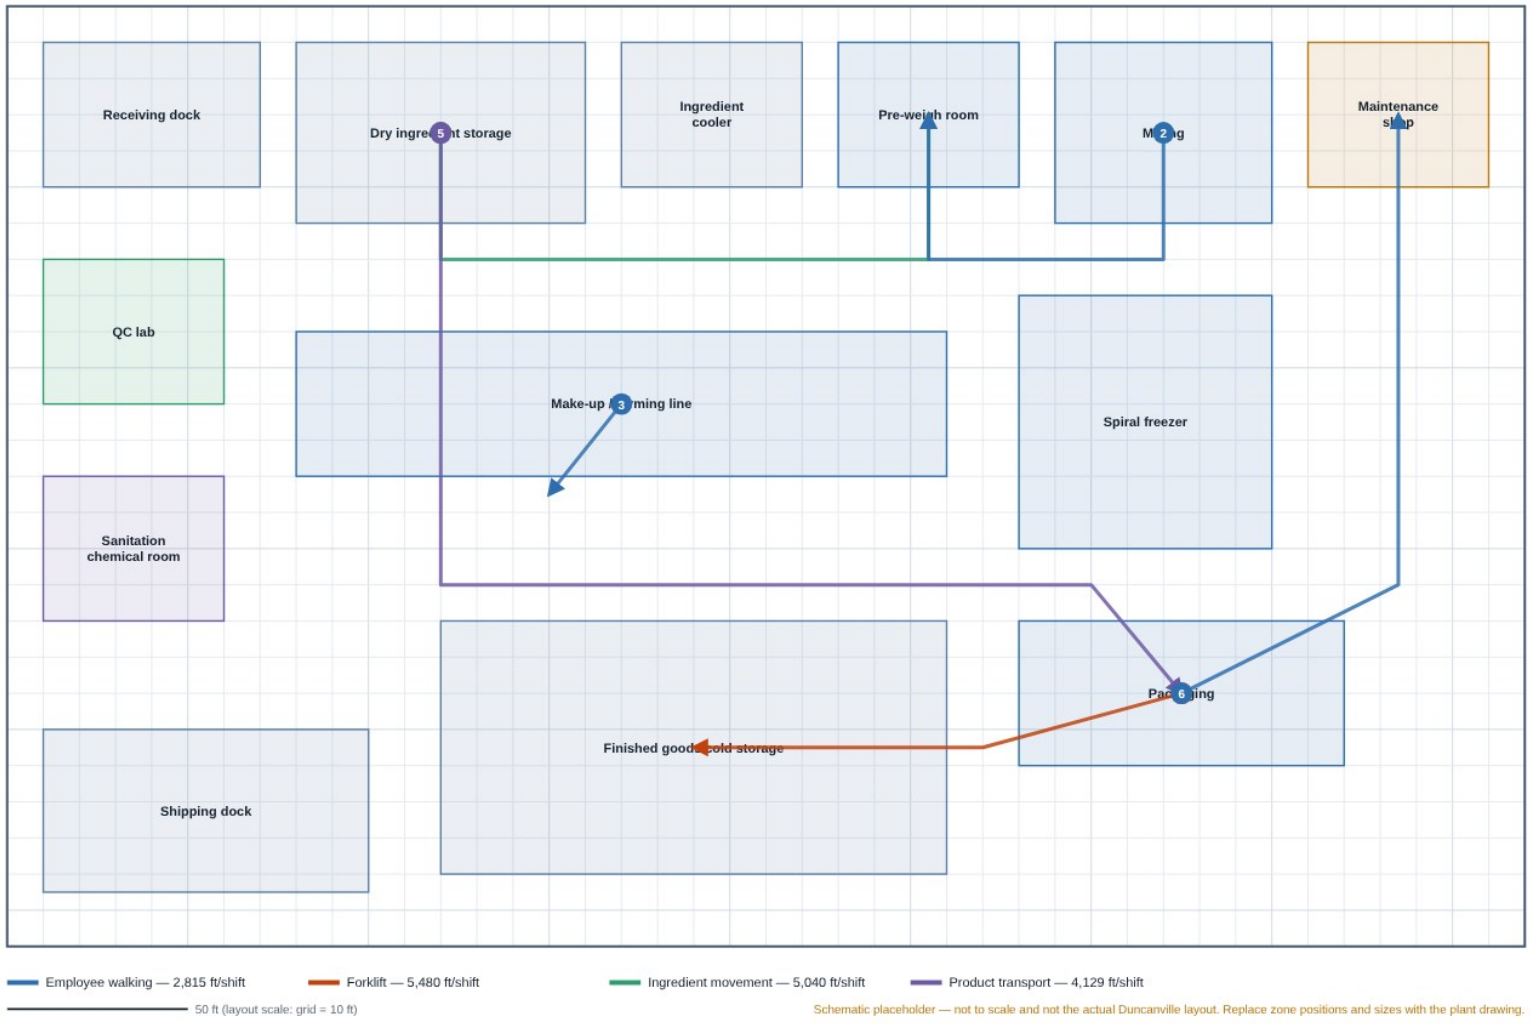

DEMONSTRATION DATA — NOT PLANT MEASUREMENTS

Value stream map — future state

Spaghetti diagram — future state

Schematic placeholder — not to scale and not the actual Duncanville layout. Replace zone positions and sizes with the plant drawing.
